

To Whom Concerned

Dear Customer of TAM International,

Normet Group has today acquired 100% of all shares of TAM International, TAM Group and its daughter companies and is now a wholly owned subsidiary of the Normet Group. This acquisition combines Normet underground equipment, product solutions, construction chemicals from TAM and solution orientated technical people to serve *You* in a truly formidable way.

Normet first acquired 40% of TAM in 2010 and formed a global partnership. During these years of partnership, we have been able to offer the industry not just tough job equipment, but a solution offering that our customers saw real value in. This has proved successful in the areas of the world where we have offered such solutions. We hope that also *You* have experienced the benefit of this wider offering during the past years.

Now with the full integration of Normet and TAM, we are looking to further develop our process offering to match *Your* needs as our valued customer.

In the coming weeks, all TAM companies will operate under the Normet name according to a separate schedule to accommodate all local legal requirements. Apart from this, the acquisition will not affect the everyday business relations you have with TAM International companies. Your current points of contacts still remain. The only exception is that now *You* will have much wider offering to choose from.

Your TAM contact person will be in touch with you in near future.

Yours sincerely,

Tom Melbye,
President Normet Group and
Managing Director of Normet International Ltd
